NFTN 2. conference 2024

Welcome to the Sign Up page for the 2nd Nordic Field Trials Network Conference: Innovation in Technology and Automation in Field Work

This conference is set to connect academics, professionals, and researchers from agriculture and technology sectors to explore and discuss the latest advancements in technology application within field trials.

The event kicks off with a networking dinner where participants can meet and get to know each other. The following day, delve into our conference where you'll gain valuable insights into the most innovative technological applications within field trials, presented by leading experts in the industry. Topics will cover areas such as robotics in agriculture, self-driving agricultural vehicles, autonomous machinery for field trials, the use of drones, and many more.

The conference also facilitates round-table discussions providing you the opportunity to exchange ideas and experiences with fellow specialists and speakers.

If you are a professional, researcher or agronomist within research institutions or plant breeding, this is the perfect chance to network, learn, and share your knowledge.

Join us and seize this opportunity to navigate the possibilities and challenges within technology and automation in field trials.

Register today by clicking on the "Tilmeld dig" button.

For further questions or more information please read the detailed program at: <https://nordicfieldtrial.net/nftn-upcoming-events/nftn-2-conference-2024/> or feel free to reach us at nfh@teknologisk.dk.

The conference will be held in English.

We look forward to welcoming you!
